ON OUR MEMBERS' SIDE

MEP Buşoi becomes Active Member

Mr Cristian-Silviu Buşoi, Romanian MEP, is member of the Group of the European People's Party (Christian Democrats). He joined the EEF Active Members in December 2018.

Mr Buşoi sits on the ITRE Committee of the European Parliament and is substitute in ENVI. He is also member of the Delegation to the EU-Ukraine Parliamentary Association Committee and Delegation to the Euronest Parliamentary Assembly.

Terna becomes Associate Member

Terna, the Italian electricity Transmission System Operator (TSO) manages the Italian high voltage transmission grid. It has 72,900 km of HV lines and 25 interconnection lines with foreign countries.

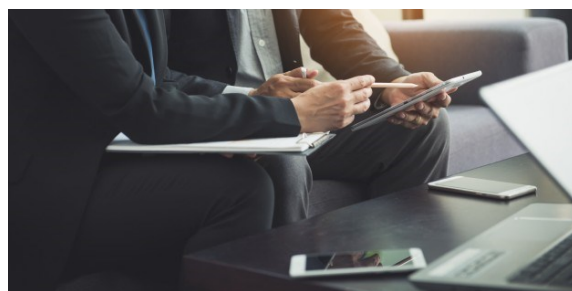

Guido Guida is the **Head of Brussels Office** of Terna. He is the former Head of Italian Dispatching Department dealing with Market and System Operation activities and, since November 2005, has covered several key positions in Terna contributing to the integration of Renewable Energy Source within the Italian electrical system, the TSO-DSO relations and the development of Storage Systems. He is currently the Chairman of the Research and Innovation Committee within ENTSO-E and Vice-Chair of ETIP SNET.

A new representative for Eurogas

Dr James Watson has recently joined **Eurogas** as Secretary General. Prior to that, he was the Chief Executive of SolarPower Europe. He worked as the Director of Public Affairs for Weber Shandwick, specialising in energy and trade policy for 7 years. Before coming to Brussels, Dr Watson worked for the Commonwealth Secretariat on a European Commission project on trade and sustainable development based in Ethiopia. He also worked for various UK government bodies.

ON OUR MEMBERS' SIDE

8th edition of the Gas map

The **European Network of Transmission System Operators for Gas (ENTSOG)**, in cooperation with **Gas Infrastructure Europe (GIE)**, has published the 8th edition of the map illustrating the development of gas supply, demand and infrastructure over 2017 and the first quarter of 2018. It provides practical, accurate and up-to-date information about the recent gas demand in European countries and the capacities in the European gas infrastructure.

This project is aiming to offer useful information to all interested parties, in a transparent and user-friendly way. The map is available for download at the ENTSOG website, [here](#) and GIE website, [here](#).
