

Development & Climate Towards #elec4.0

Paris, 8 October 2015

Eurosites George V

28, Avenue George V - 75008 Paris

Moderated by Arnaud Fleury, Journalist

National Engagement of the year in France, the fight against climate change is above all a global challenge. Everyone is concerned, industries and citizens, regions and nations. In this global challenge, electricity is at the core of these mutations, and in the best position to satisfy our future needs on **technological, environmental, social and economical levels**.

Main driver of a low-carbon strategy, electricity will be the core element of a safer and more independent European Energy Union, the energy of the new world !
