

# TEN-E Regulation: effectively aligning Europe's energy infrastructure and climate goals

Dimitrios Chaniotis, Chair, System Development Committee, ENTSO-E

3 March 2021, 16h00-17h30  
EEF Online Energy debate

# ENTSO-E welcomes the new TEN-E proposal as a key instrument to deliver the Green Deal objectives

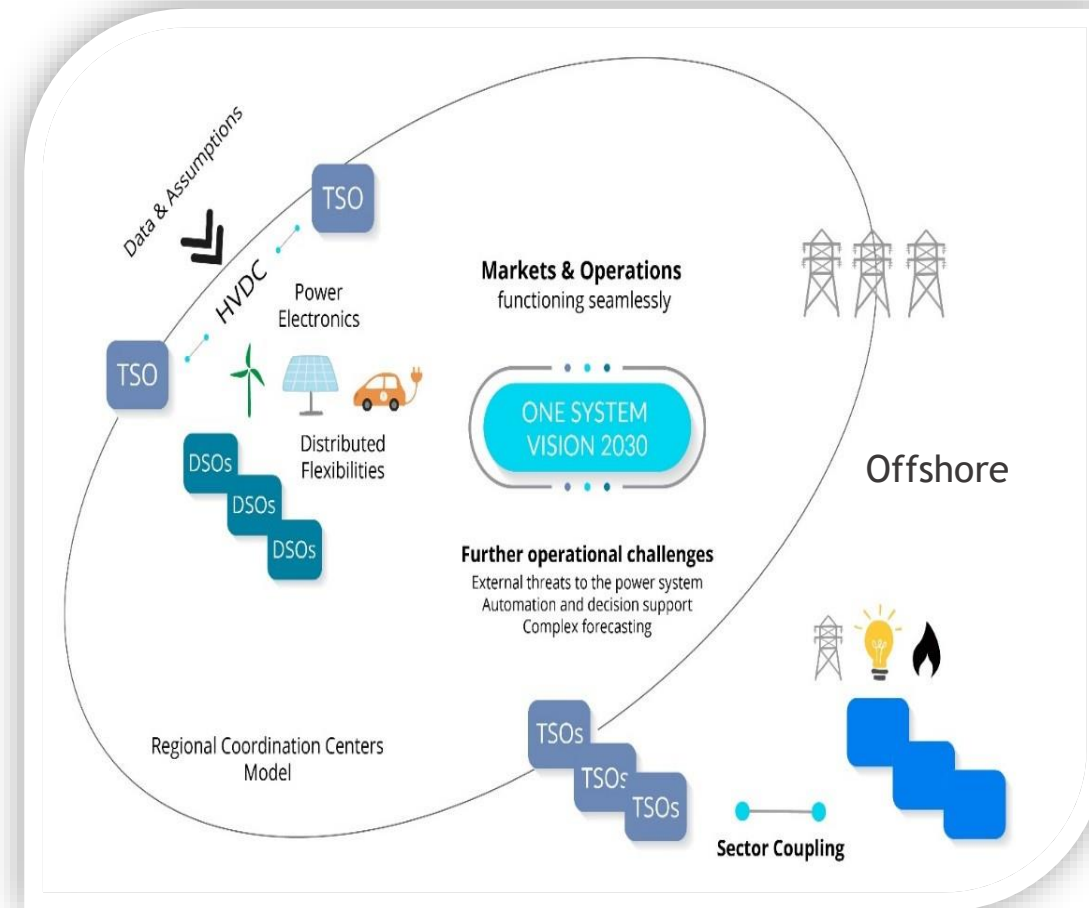

Inclusion of offshore hybrid projects & new task for ENTSO-E to elaborate offshore development plans

Enhanced provisions regarding energy system integration, including provisions for energy system-wide cost-benefit analysis

Support for innovation technologies and smart solutions

Recognition of the importance of interconnections with 3<sup>rd</sup> countries

## Need for a framework for a long-term holistic “one energy system vision”

## Some improvements still needed

Governance of TYNDP:  
clarification of roles &  
responsibilities of EU  
bodies

Offshore and onshore  
grid planning  
processes and  
timelines' alignment

Full energy system  
view - a multisectorial  
approach beyond gas  
and electricity

CBCA and financial  
support: need for fair  
and simple financing  
mechanisms

Cost sharing for  
offshore: a fit-for-  
purpose framework to  
raise the necessary  
financial support

Projects of Mutual  
Interest (PMIs) criteria  
to allow the necessary  
interconnection with  
neighbors

Other elements: simplification of processes and PCI stability, fair identification of infrastructure gaps, CBA, 500 MW criteria, interconnection criteria
